

FACT SHEET

- MedFinManager is a national leader in the facilitation of medical care for patients who have been injured in third-party accidents and require treatment using a lien.
- MedFinManager has a range of services directed towards enhancing the cash flow and reducing the risk of bad debt for ambulatory surgery centers.
- MedFinManager provides a full range of services to support a **Consensual Lien** Program.
- MedFinManager's **Consensual Lien Facilitation and Purchase Program** approves and purchases accounts for lien-based health services, either medical or surgical.
- MedFinManager's **Consensual Lien** Program has no significant impact on a provider's billing routine. The Program includes all necessary risk assessment, underwriting, all legal and administrative processing requirements, and training.
- MedFinManager provides financial services to hundreds of ASC's, physicians, and other healthcare providers, in 18 states, and is currently expanding nation-wide. MedFin's clients include specialty physicians, hospitals, clinics and ambulatory surgery centers.

The MedFin approach creates a true win/win partnership with the surgery center, physician, patient, and the other parties involved in these highly technical and legal transactions. The significant advantages of the MedFin Program are:

- Provides the opportunity for surgery centers to increase revenue by accepting lien-based patients, without risk, who may have formally been turned away.
- MedFin enhances cash flow in very immediate ways, by relieving the many hassles and risks that are inherent in treating personal injury patients.
- **MedFin guarantees payment in 30 days.**

- The **MedFin program is a *Without Recourse purchase***, which means that MedFinManager assumes the full-risk associated with holding aging receivables. If a lien eventually becomes uncollectable, MedFinManager assumes the total loss.
- MedFin will never ask for a refund based upon the eventual outcome of a patients' legal claim.
- Through its **Consensual Lien** program, MedFinManager provides all the necessary coordination between the attorneys, the patient and the physician – and provides the surgery center with a guaranteed approval *prior* to the patient receiving services.
- MedFinManager will work closely with the local physicians to ensure a smooth process for the treatment and admission of lien-based patients. This will allow the physician to continue the normal practice of referrals to the facility.
- In addition to working with healthcare providers on going-forward cases, MedFin also makes lien-based accounts receivable acquisitions.
- There are no fees associated with MedFin programs, no minimum required volumes, nor maximum billing amounts, and the physician remains in complete control of the patient's treatment, at all times.
